

Niveditha Erri

Performance Testing Lead | SAP |  LinkedIn |  nivedithaerri@gmail.com |  +91 9346417123

SUMMARY

Results-driven Performance Testing Engineer with expertise in SAP and Digital ecosystems. Skilled in JMeter and LoadRunner migrations, distributed testing frameworks, and real-time monitoring solutions. Proven record of delivering scalable performance validation, optimizing system reliability, and driving innovation in enterprise environments within the UK Energy domain.

KEY SKILLS

- **Performance Tools:** JMeter, LoadRunner, SAP GUI, SAP API Testing
- **Monitoring & Visualization:** Grafana, InfluxDB
- **Service Virtualization:** WireMock
- **Engineering Concepts:** Distributed Testing (Master-Slave), Correlation, Parameterization, SLA Validation
- **Programming:** C, Java
- **Testing Methodologies:** Load, Stress, Baseline, Benchmarking, Proof-of-Concept (POC)
- **Professional Skills:** Stakeholder Management, Knowledge Sharing, Cross-functional Collaboration
- **Domain Expertise:** SAP AR TRT, SAP SPS, MHHS Reverse Migration, UK Energy

WORK EXPERIENCE

Cognizant - Performance Tester

Jan 2022 – Present

- Directed performance testing for SAP and digital applications, ensuring scalability for 7,500+ concurrent users.
- Transitioned performance scripts from LoadRunner to JMeter & implemented distributed testing frameworks and Established real-time monitoring dashboards with Grafana and InfluxDB.
- Delivered SLA-compliant benchmark reports and optimized throughput by resolving bottlenecks proactively.
- Supported SAP AR TRT and API performance testing to strengthen integration stability.
- Implemented WireMock stubs to accelerate test cycles and reduce external dependencies.
- Drove proof-of-concept initiatives to minimize LoadRunner reliance, achieving cost savings and modernization.

PROJECTS

- **Centrica QE&A (Jan 2023 – Present)** Validated high-scale systems, migrated scripts to JMeter, and introduced distributed testing with Grafana/InfluxDB monitoring.
- **Centrica AR QEA (Jul 2025 – Dec 2025)** Designed load, stress, and baseline tests; delivered SLA benchmarks; implemented WireMock stubs for MHHS migration.
- **Nike Project (Nov 2022 – Jan 2023)** Developed LoadRunner scripts for web/backend testing; executed performance tests for 90+ users; defined SLA benchmarks and test data strategy.

INNOVATION & TRANSFORMATION

- Pioneered migration from LoadRunner to JMeter across enterprise projects.
- Automated SAP GUI scenarios using JMeter.
- Developed WireMock stubs for complex integrations.
- Built Grafana/InfluxDB dashboards for real-time visibility.
- Conducted JMeter knowledge-sharing sessions to upskill teams.

REWARDS & RECOGNITION

- Above and Beyond Award – NFT CoE Bangalore
- Appreciation from Project Manager for SAP SPS contribution
- Recognition for MHHS Reverse Migration innovation

EDUCATION

2018 – 2022	Bachelor of Technology (CST) at MIT	(GPA: 8.5/10.0)
2016 – 2018	Intermediate at Sri Chaitanya Jr. College	(CGPA: 9.3/10.0)
2015 – 2016	SSC AP BSE	(CGPA: 9.3/10.0)
